

Natalee Bishop

bishopna1209@gmail.com ♦ (385)-333-8327 ♦ Digital Portfolio: nbishop1.github.io ♦ Ogden, UT

Computer Science graduate (April 2026) with experience supporting and developing software systems across many environments. Proficient in troubleshooting, managing databases, and working with technologies including C#, ASP.NET, SQL, Python, and JavaScript. Experienced in configuring development environments and collaborating in team based projects. Strong foundation in diagnosing technical issues, documenting solutions, and supporting users, with an interest in IT support, systems administration, and cybersecurity.

SKILLS

Technical Skills:

- Programming Languages: Java, Python, C#, JavaScript, SQL
- Familiar: C++, C
- Web Technologies: HTML, CSS, ASP.NET, React
- Databases: MongoDB, Microsoft SQL Server, SQLite
- Tools: Git, GitHub, Node.js, Bash / Shell scripting, Vite
- Environments: Visual Studio, Visual Studio Code, Eclipse
- Operating Systems: Linux (Ubuntu), Windows, XV6 (Unix-like)

Relevant Projects:

- *Capstone Project*: Collaborated in a team to design and develop a university grant management system to manage grants and applicants to submit and track applications through a structured review workflow. (C#, ASP.NET, MongoDB, React, Vite, JavaScript/HTML/CSS)
- *Software Engineering II*: Worked in a team to build a traditional Speed card game simulator using the MERN stack, implementing both frontend and backend functionality with interactive gameplay features. (React, Node.js, MongoDB, JavaScript)
- *Advanced Database Programming*: Collaborated in a team to design and implement an e-commerce database by transforming relational SQL data into denormalized NoSQL documents using MongoDB, demonstrating data modeling and query translation skills. (MongoDB, SQL, Command Line)
- *Advanced Object-Oriented Programming*: Developed a video game in Java, incorporating object-oriented design principles, GUI development, animations, and image processing. (Java, OOP, Eclipse)
- *Scripting Languages*: Built a cross-platform Bash script to configure a Python (Conda) environment, install dependencies, and run a system health monitoring tool that collects computer metrics, then assigns a color and writes a detailed report. (Python, Bash, Virtual Environment)

EDUCATION

Bachelor of Science in Computer Science - Weber State University, Ogden UT	Apr 2026
Associate of Applied Science in Computer Science - Weber State University, Ogden UT	Dec 2024
Certificate of Proficiency in Programming Essentials - Weber State University, Ogden UT	Dec 2023

WORK EXPERIENCE

Testing Proctor – Weber State University, Ogden UT	Nov 2023 – Present
Financial Service Representative – Goldenwest Credit Union, Ogden UT	Nov 2021 – Nov 2023
Sales Manager and Acting Assistant Manager - Carters, Ogden UT	Apr 2019 – Nov 2021
